

Grant & Greg did a great job on the rangehood install in our kitchen which had existing cabinetry and a high ceiling. I liked Grant's idea of installing the flue through the cabinet and roof, especially as he could provide a Memorandum of building to certify his work.

The work was done quickly, no stops, and it was a neat job. Whilst there was the usual dust from drilling and other bits, there wasn't a big mess left behind. They were also mindful of not damaging the flooring, cabinets and countertops, and had brought along material to protect the areas.

I appreciated that Grant was easy to communicate with via email and phone. He was upfront with his ideas and costings which helped the decision process. Greg was good in explaining the task at hand as the job went along.

I'd certainly recommend this team to install your rangehood!

Thanks

Esther
